

## Coding Worksheet

In response to the open-ended prompt: What was the most meaningful part of your experience with this program?

Open-ended response:	Emergent code:
Because of this program I feel a little less shy meeting new people	
I want to take more classes like this so that I can become better and better at it	
This made me feel like I could really help others	
The instructors were really nice and very helpful	
I really liked learning how to present my work to others	
I learned something new and I made new friends	
I never knew how to draw before and now I draw all the time. Next I want to learn how to paint!	
I feel really proud of myself for doing this	
I hope I can take another class with Ms. T.	

In response to the prompt: Please list three things you would like us to change about this class:

A priori codes:

Program content	Team-based learning structure	Disinterest in subject matter
Opportunities for continued learning/practice of art	Timing or frequency of the program	Opportunities to make connections outside of the program

Open-ended response:	A Priori codes
I would make it happen more often	
I wish that there would have been more opportunities for my parents to come and be a part of it	
I really liked what we did during the program but I'm sad because I don't think that I can keep painting without the class	
I would change the amount of time we spend working in teams. I liked my team and want to work with them more	
I think that my brother would like to come. Can we invite others to join us next time?	
Too much group work. I like to work on my own.	
It was great! I wish it was all year round. It was way too short!	
I want to pick my team next time.	
I want to know how I can keep making plays with my friends. Do you have any advice about how I can do that?	
I had to miss a class and when I came back, I felt lost and nobody was able to help me catch-up.
